SEWAGE DAMAGE & CLEAN UP

Following a sewage spillage the first call should be to Assure Services where we can provide immediate assistance. Our emergency sewage cleaning specialists can respond at short notice and make a detailed assessment of the damaged area. Sewage spillages not only look and smell unpleasant but pose a risk to health. We can help and fast !

The Sewage Damage Services we provide include:

- 24 hour response guarantee
- Home and business refurbishment including buildings & contents
- Containment & removal of sewage spills and toxic materials
- Drying of buildings including sanitising of fixtures, floorings and furnishings
- Waste disposal in a controlled and environmental manner
- Odour removal and disinfection programme
- Final deep clean ready for builders and decorators

It is highly recommended that sewage damage is dealt with quickly following the event. This is for many reasons which are not just health related.

The longer the fabric of the building is exposed to sewage (as it contains water) it will become weakened, may expand (in the case of wood), and if not dried will smell and eventually support fungal growth which has another adverse impact to health.

This will have the effect of increasing the cost of repair to the building and prevent carpets or any redecoration being carried out.

It should not be underestimated that correctly drying a home or building is key to reducing secondary damage and denying an environment for bacteria and viruses to survive.

For more information on the Flood & Water Damage cleaning services we provide, please give us a call or email us to see how we can help using the details below.
